

Math Department MakerBot Replicator 2 (<http://www.makerbot.com>)

– location: DL415
(if the door isn't open, please see Mel for the key)

You will need to download the Makerware software to use the printer.
Downloads for Makerware software available for Mac, PC and Linux at:

<http://www.makerbot.com/makerware/>

Mathematica 9.0 available to all in department. The Mathematics Department has a departmental license. (there is also a free download for students available.) The downloads are available on the Yale University Software download site:

<http://www.yale.edu/software>

A few sites to remember:

3D Printing and Scanning Support is available on the Wolfram site:

<https://www.wolfram.com/technology/guide/3DPrintingScanningSupport/>

Thingiverse: good place to start for ideas – download the stl files for hundreds of already built objects – <http://www.thingiverse.com/>

Please feel free to stop by either DL415 or the department's main business office and ask Claudia for assistance. (claudia.villano@yale.edu)
